Adverse Reactions to Biologics

Editors: **Lluís Puig**
Wayne Gulliver

In many areas of medicine physicians still face the great challenge of finding therapies that will meet the patients' needs. In dermatology the challenge has arisen on multiple fronts through advances in the understanding of the immunopathogenesis of many inflammatory and malignant cutaneous disorders. Breakthroughs, combined with significant developments in targeted immunotherapy, have resulted in improved outcomes as these newer therapies are being used for both approved indications and as off-label therapies for various chronic inflammatory skin disorders and many forms of skin cancer.

In the expectation that by truly understanding the safety profile of these targeted therapies patients' outcomes will be significantly improved, this book offers insights into topics such as adverse reactions, infectious complications and the perioperative use of biologics in psoriasis, immunogenicity of biologic therapies, paradoxical reactions, safety of biologics used to treat autoimmune bullous diseases and primary cutaneous lymphomas, adverse reactions and skin manifestations of therapies targeting melanoma and non-melanoma skin cancer and other neoplastic diseases.

Eminent researchers with extensive clinical experience have contributed to this publication, providing an in-depth overview of the latest knowledge in this field.

CONTENTS

Preface: Puig, L.; Gulliver, W.

Introduction – Biologics in Dermatology: Indications and Off-Label Usage: Gulliver, W.; Puig, L.

Adverse Reactions to Biologics in Psoriasis: Lockwood, S.J.; Prens, L.M.; Kimball, A.B.

Clinical Trial and Registry Data: Gooderham, M.; Papp, K.

Immunosuppression/Infections across Indications: Al-Khalili, A.; Dutz, J.P.

The Immunogenicity of Biologic Therapies: Garcês, S.; Demengeot, J.

Paradoxical Reactions: Anti-Tumor Necrosis Factor Alpha Agents, Ustekinumab, Secukinumab, Ixekizumab, and Others: Puig, L.

Bullous Diseases: Corbaux, C.; Joly, P.

Adverse Reactions of Antibody-Therapy for Primary Cutaneous Lymphomas: Rituximab, Brentuximab Vedotin, Alemtuzumab, and Mogamulizumab: Saulite, I.; Guenova, E.; Hoetzenecker, W.

Adverse Reactions to Biologics: Melanoma (Ipilimumab, Nivolumab, Pembrolizumab): Hwang, S.J.E.; Fernández-Peñas, P.

Skin Manifestations of Targeted Antineoplastic Therapy: Sanmartín, O.
